License Types	4
Installing M4 ISO FX	5
Starting M4 ISO FX	

Systems Requirements

Windows

Operating System	10 Pro 64 Bit
Memory	8 GB and higher
Disk	900 MB free space
Monitor Resolution	1400 x 900 1920 x 1080 recommended
Mouse	3-Button Mouse

License Types

In order to install M4 ISO FX, you need a license.

Two different types of licenses are available for M4 ISO FX, single-user licenses and network licenses in alternatively a test license.

Network License

If you purchased a network license, you receive a license file that contains one or more licenses for M4 ISO FX. This requires to install the CSG License Server software on a Windows computer. Please, read the *CSGLicenseServer_710.pdf* and install the CSG License Server as described.

Single-User License

This type of license is a host-based license issued for your PC only. It allows you to run M4 ISO FX only on this PC.

The license is usually sent to you by e-mail. Before you start the installation, save the license file to a temporary location on your hard drive (the license file name is for example FX123456.csglic).

Test License

If you have not yet purchased M4 ISO FX and not yet received a license, you can request a free, time limited (30 days) trial license from within the installation program.

Installing M4 ISO FX

Administration privileges are required to install the software.

During the installation process, you will be prompted for the location of the license file. After the installation is complete, you can delete the license file from the temporary location.

Before you start the installation, please close all applications.

Having started $m4_iso_fx_710_windows_x64.exe$ the installation files are extracted into the temporary directory. The Installation Wizard will then be launched.

Installation Wizard

In the first window of the Installation Wizard choose the language for the Installation Wizard. The actual M4 ISO FX product language can be chosen in a later step.
